LMUHACKS SPONSORSHIP PACKET

ABOUT

LMUHacks is a multidisciplinary hackathon hosted by various organizations at LMU taking place on April 15th from 9:30am to 10:30pm at the LMU campus in Los Angeles, CA. It is estimated that about 60-70 students will attend. Students from different majors will get into teams of 2-4 to spend one day designing and developing a project from scratch. There will be three project tracks: Computer Science, Electrical/Computer Engineering, and Mechanical Engineering. At the end of the day, the teams will present their projects to judges and will be awarded prizes based on different categories. Throughout the day, there will also be workshops for students to learn new skills both inside and outside their field of interest. This event is beginner friendly, and will be assisted by industry professionals who are at the event as mentors and judges. It is estimated that about 20-30 mentors/judges will attend.

This will be the first time LMUHacks has been hosted since the pandemic. This year's LMUHacks is centered on "Hacking for Good" with students being challenged to create something that brings a positive change to the world. Students will be encouraged to hack for good by creating projects that are based on the 17 UN Sustainability Development Goals.

GOALS

1. Provide an opportunity for students with different educational backgrounds to come together, build community, and form new connections.
2. Encourage students to build a project to put on their resume.
3. Give students a practical way to apply the concepts that they've learned in the classroom while learning new skills
4. Facilitate networking between students and industry professionals.
5. Further LMU's commitment to service and justice by inviting students to address real world problems and create a project based on the UN Sustainability Development Goals.

PERKS

- Promote company or product to LMU students, faculty, and volunteers
- Connect to Loyola Marymount University students and faculty
- Give back to the community and support a student organization

SPONSORSHIP TIERS

	Silver $200	Platinum $400	Gold $600
